Commercial Vehicle Wheel Service Course Outline

Introduction

This "Certificate Course" is designed for mechanics apprentices and tire people who are responsible for removing and installing wheels, and also for drivers to help them on their pre-trip inspection.

This comprehensive 3-hour training program teaches service personnel the risks of improper installation, how to spot defective components, how to properly prepare wheels for installation, correct tightening procedures and how to comply with recommended procedures for torque checks and preventative maintenance.

To be certified, you must pass an exam with a minimum of 80 %.

Course Content

This course will cover the following content:

- Training Video (Keeping Your Wheels On)
- Lines of Communication
- Safety Practices - Road Repairs
- Raising & Supporting Vehicles
- Three Major Wheel/Rim Systems
- Step by Step inspection and installation
