Commercial Vehicle Wheel Service Course Outline

Introduction

This course is designed for mechanics apprentices and tire people who are responsible for removing and installing wheels, and also for drivers to help them on their pre-trip inspection.

This 3-hour training program teaches service personnel the risks of improper installation, how to spot defective components, how to properly prepare wheels for installation, correct tightening procedures and how to comply with recommended procedures for torque checks and preventative maintenance. The Wheel Installer training session also describes the various wheel hub assemblies used in the Commercial Transport Industry, along with the correct removal, inspection, installation and torquing procedures according to the manufacturer.

Course Content

This course will cover the following content:

- General overview & open discussion
- Lines of Communication
- WCB Regulations & Standards, OSHA Standards
- Safety Practices
- Raising & Supporting Vehicles
- Three Major Wheel/Rim Systems
